

Messe Frankfurt UI Kit

Streamlining Design and Enhancing User Experience

V2.0.0

The Messe Frankfurt UI kit is a pre-designed collection of user interface elements, helping designers streamline workflows, maintain consistency, and deliver exceptional user experiences. It accelerates design processes, reduces repetitive tasks, and fosters collaboration among teams.

Typography

The typographical hierarchy establishes a structured system of fonts, sizes, and styles. It helps prioritize content, ensuring that headings, subheadings, and body text are visually distinct. This hierarchy enhances readability, user experience, and information organization within web applications.

Icons

Icons represent actions, objects, or concepts. They enhance user interfaces by providing intuitive and compact ways to convey information. Icons improve user navigation, add visual appeal, and aid in communicating functionality within web applications.

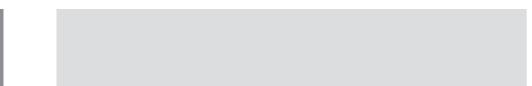

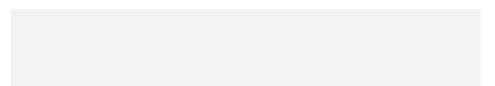

Colors

The color selection encompasses versatile universal values, applicable for both product and corporate branding. For brand-specific components, the theme section covers the the product and corporate brand identities.

Universal values

Text	Headlines	Body Copy	Copy Lead	Muted	Text inverted

Textarea

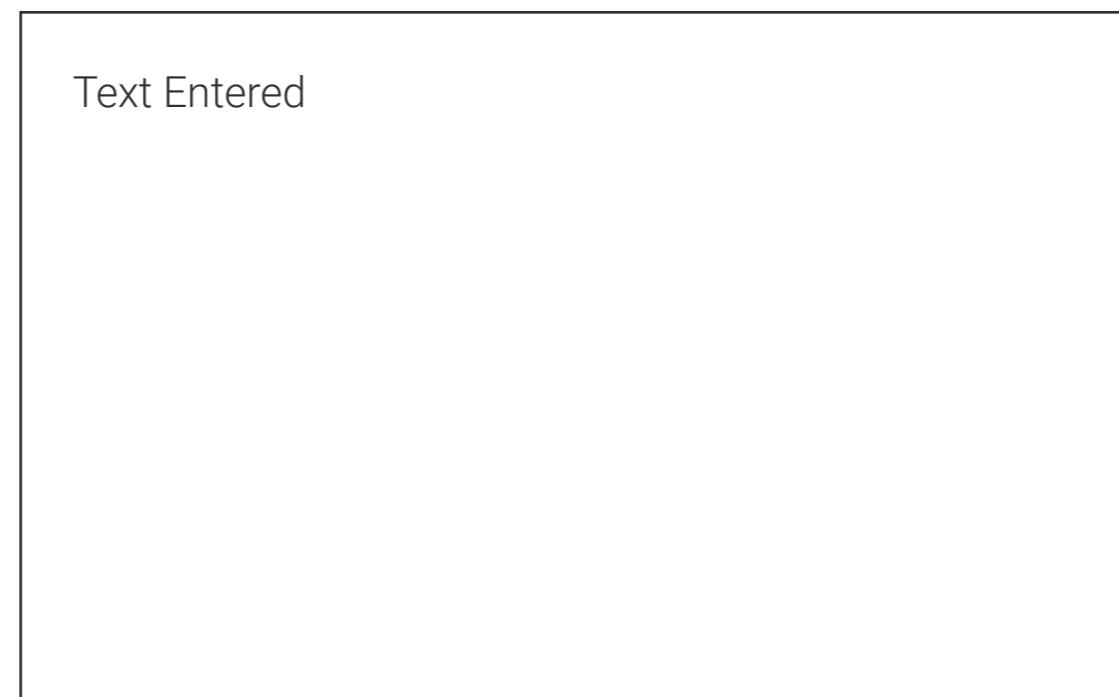

A textarea field is a larger input area that allows users to enter multiple lines of text. It's invaluable for user-generated content, comments, and messages, providing a versatile platform for longer textual inputs.

:enabled

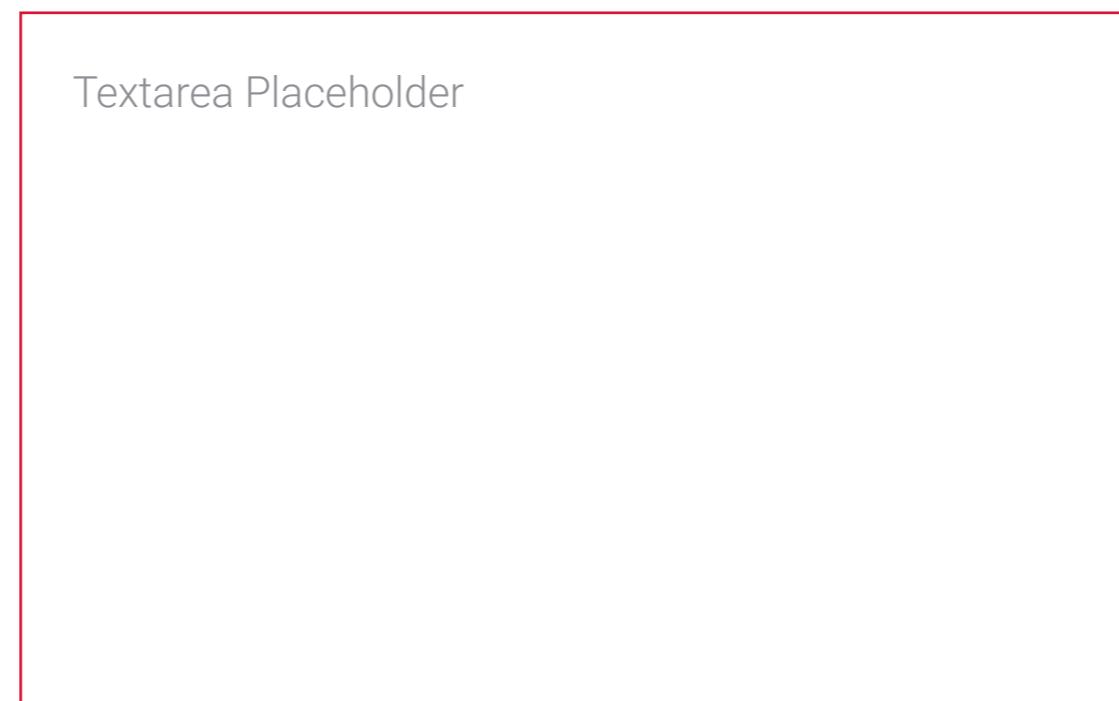

A large rectangular input field with a thin black border. Inside the field, the text "Textarea Placeholder" is centered in a small, gray, sans-serif font.

:active/entered

A large rectangular input field with a thin black border. Inside the field, the text "Text Entered" is centered in a small, gray, sans-serif font.

:error

A large rectangular input field with a red border. Inside the field, the text "Textarea Placeholder" is centered in a small, gray, sans-serif font. Below the input field, the text "Error Message" is displayed in a small, red, sans-serif font.

Chips

A chip is a compact, customizable UI element. It typically represents small pieces of information, such as tags, tokens, or contacts. Chips are useful for visualizing and interacting with discrete data, enhancing the user interface, and offering an organized way to manage and display relevant content.

Captcha

A CAPTCHA (Completely Automated Public Turing test to tell Computers and Humans Apart) is a security feature that requires users to complete a challenge to prove they're human. CAPTCHAs protect websites from automated bots and enhance security by presenting tasks like image recognition or text entry, ensuring safe and genuine interactions.

Screen (min-width: 1024px)

Screen (min-width: 768px)

Screen (min-width: 1280px)

The search interface for screens with a minimum width of 1280px features a large search bar at the top with a placeholder 'Search Placeholder'. Below the search bar are three navigation links: 'Overall Search' (grey), 'Event Search' (red), and 'Overall Search' (grey). To the right of the search bar is a red 'SEARCH' button with a magnifying glass icon. The main content area is a large pink rectangular placeholder.

Screen (min-width: 1024px)

The search interface for screens with a minimum width of 1024px is identical to the one for 1280px, featuring a large search bar with placeholder 'Search Placeholder', three navigation links ('Overall Search', 'Event Search', 'Overall Search'), and a red 'SEARCH' button. The main content area is a large pink rectangular placeholder.

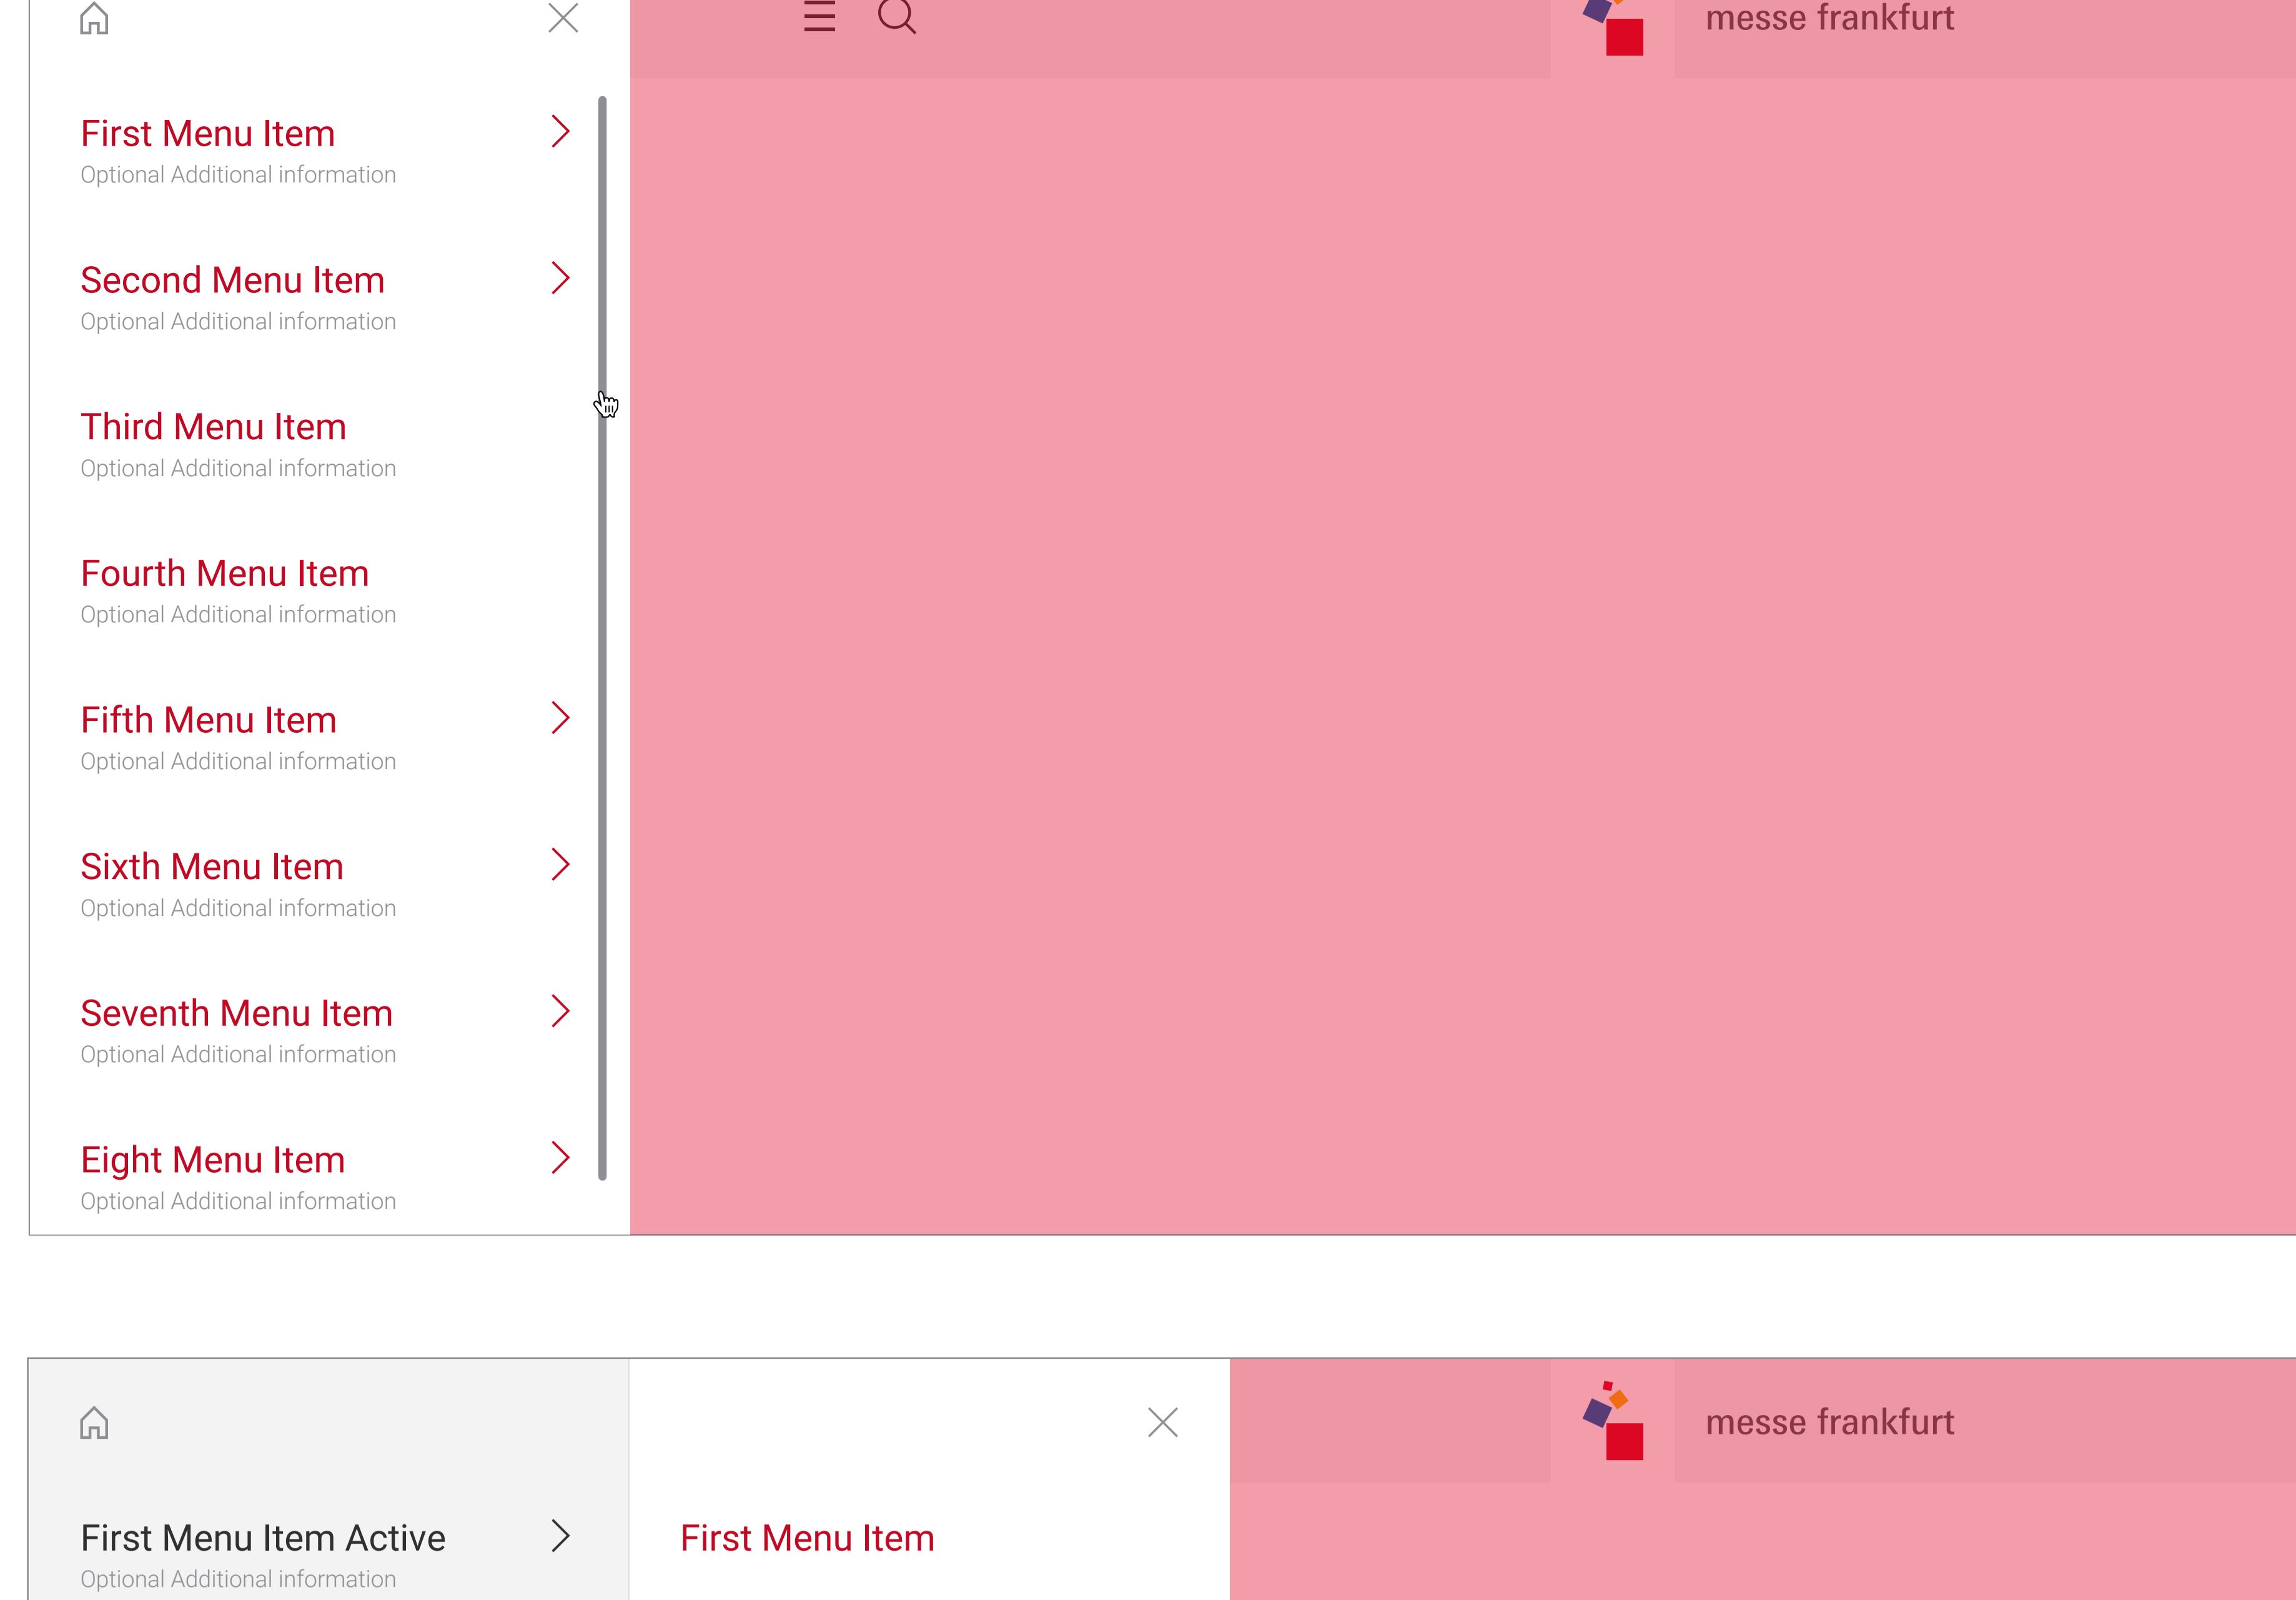

Screen (min-width: 768px)

The search interface for screens with a minimum width of 768px includes an additional 'Category' section below the main search bar. This section contains a dropdown menu with a placeholder 'Search Placeholder' and a downward arrow icon. The rest of the interface is identical to the 1024px version, with the main content area being a large pink rectangle.
